Response to Arguments

The Applicant filed an amendment received on August 11, 2003. In this amendment, Applicant amended the specification, drawings and claims. In addition, two new claims were added. No new matter was introduced.

Regarding the specification, the proposed changes are approved and the previous objection to the specification is withdrawn.

Similarly, the proposed drawing changes are approved and the previous drawing objections are withdrawn.

Regarding the claims, the Applicant's arguments are persuasive with respect to the amended claims and the previous rejections are withdrawn.

REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: Regarding independent claims 20 – 23, 28 and 29, a review of prior art failed to disclose or make obvious a table including a supporting portion for supporting a sample and an evacuation portion disposed outside an outer region of the supporting portion and a pipe which communicates with the evacuation portion for evacuating a gas over a face of the sample.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. U.S. Patents 5,254,856 to Matsui, et al and U.S. Patent 4,851,097 to Hattorri, et al both describe a stage with a support table and a moving mechanism for moving the table. However, these references are silent with respect to a table including a supporting portion for supporting a sample and an evacuation portion disposed outside an outer region of the supporting portion and a pipe that communicates with the evacuation portion for evacuating a gas over a face of the sample.
